**NOT FOR NAVIGATIONAL PURPOSES**

Coordinates are expressed in degrees and minutes.

Straight lines of this reserve, other than meridians and parallels, are geodesic lines (shortest line between points), they are not lines of constant bearing (rhumb line or loxodrome).

Coordinates of geodesic lines (other than gazetted boundary coordinates) have been produced for indicative purposes only and are approximate. Coordinates of the final version may vary slightly from those presented here due to the application of more precise methods of data processing.
